EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Jenkins on February 13, 2009.

Claim

Please amend the claim as follows:

18. A hazardous material storage facility comprising: an upper floor having openings therethrough; a lower floor that is sloped from an upper end to an elongated basin; at least one vent duct disposed beneath the upper floor and adjacent to the lower floor basin, the vent duct including vent openings structured to allow air and fumes to be introduced into the vent duct; and
means for removing the air and fumes in the vent duct therefrom;
wherein the elongated basin includes a channel disposed at the bottom of the basin;

wherein said at least one vent duct is disposed below said lower floor and above the bottom of said channel, said vent openings extending between said at least one vent duct and said channel, and

wherein said lower floor includes a turbulator comprising at least one protuberance extending partially across said channel.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

3. The closest cited art being be Romig (U.S. 6,305,131) that teaches the structure of the storage facility. The present invention distinguishes itself from the building structure by including a specifically claimed and oriented ventilation system. The claim includes the limitations that require the vent duct be disposed below the lower floor and above the bottom of the channel. Additionally, the claims require that the lower floor contain a turbulator that comprises at least one protuberance that extends partially across the channel. The inclusion off all the elements and structural limitations set forth in this explicit orientation and claimed configuration was not found disclosed within the art. Additionally, one of ordinary skill in the art at the time of the invention would not have found it obvious to modify Romig (U.S. 6,305,131) as Applicant has claimed. Accordingly, the claim is distinguished from the prior art and rendered patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
